Message From Our Team

For almost three years, Ukraine has been living in the reality of a full-scale war. This time has changed everything. But some things stay the same: our belief in what we do, our dedication to the mission, and our desire to help.

Our team has not stopped working for a single day. Every day we face different challenges, but we do not let them break us. On the contrary — they give us strength to find solutions, act fast and responsibly, and stay human.

Together we went through the pandemic, and together we faced the challenge of war. Together we are learning to be flexible, to make difficult decisions, and to keep believing in ourselves and in the people we support.

We truly know: **we are in the right place at the right time.** Our work is a mission that continues 24/7. It doesn't end when the office closes, because people's needs don't follow a schedule. This understanding gives us determination, teaches us to think ahead, and helps us stay effective even in the hardest moments.

Many challenges still lie ahead. But we are confident: **together we can do more.** We see how lives are changing around us. This inspires us, gives us hope, and reminds us why we chose this path.

Every step we take is a contribution to a future where kindness and support are stronger than any difficulty.

2024 YEAR IN NUMBERS

260

projects completed

22

regions of Ukraine reached

63

large families received targeted support to improve living conditions

37

children received hearing aids, medicines, and rehabilitation courses

22

medical facilities received essential equipment and supplies

~25 000

patients gained access to better healthcare through our projects

161

units of equipment were provided to Ukraine's Defense Forces

8

charitable organizations supported in developing social initiatives

War Time Aid

In the first days of the full-scale invasion, we launched an emergency response program — **Ukraine war help center**, which focuses on four key areas:

SUPPORT FOR DEFENSE FORCES — providing tactical gear and protective equipment to ensure the safety of defenders.

AID FOR WAR-AFFECTED CIVILIAN — helping internally displaced people and families with urgent needs.

STRENGTHENING LOCAL INITIATIVES — supporting local charitable and volunteer organizations.

MEDICAL SUPPORT — supplying hospitals with emergency and rehabilitation equipment.

As part of this program, our team constantly monitors the situation and responds quickly to emergencies. In practice, the program also includes rapid disaster response.

76

aid projects implemented

12,131,400 UAH

total program budget

“This work is not about numbers, it's about people. About those who stood strong because of support. And this support must continue

Sofiia Smorodinova

Medical Projects and Initiatives

Our medical projects aim to improve the quality of treatment and rehabilitation for patients, as well as to support healthcare professionals by giving them opportunities to upgrade their skills. At the same time, we work to strengthen medical infrastructure to make healthcare more accessible in local communities.

Our key focus areas:

REHABILITATION — comprehensive support for rehabilitation centers helping people restore mobility, basic skills, and independence

WOMEN'S HEALTH — equipment for gynecological and maternity departments, including tools to improve reproductive health

CHILDREN'S HEALTH — assistance for hospitals treating children, including those injured by shelling or military actions

FRONTLINE HOSPITALS — support for medical facilities working in high-risk areas and serving as the first stage of medical evacuation

2024 Results:

12

medical facilities supported

36

units of new medical equipment delivered

48

healthcare professionals completed training

~25,000

patients gained access to better medical care

18 MLN UAH

was allocated for medical projects in 2024

“Every new unit of equipment, every training session, and every medical project is a chance for recovery, safe childbirth, effective rehabilitation, and a life without pain

Vladyslava Andrushchenko

Children's Health Relief Project

Since 2012, we have been providing individual support for children with serious illnesses — covering the cost of expensive treatments, prosthetics, rehabilitation, and purchasing vital medicines.

2024 Highlights:

- 22 children fighting cancer received life-saving medications
- 10 oncology departments in public hospitals received support for their daily treatment needs
- 10 children with hearing loss received hearing aids
- 5 children with autism and cerebral palsy completed rehabilitation courses

“

Many types of childhood cancer are curable — if diagnosed on time and treated fully. For children with autism and cerebral palsy, rehabilitation is not a luxury but a vital need.

And for children with hearing loss, hearing aids play a key role in their development and quality of life. Our goal is to make this support accessible.

Valeriia Granovska

Words from families of seriously ill children

“Thanks to this treatment course, **my son made a huge step in his development**, speech, and social skills! Zakhar started speaking more, using new words, even putting them into short phrases! Now he can explain what he wants and even say when something hurts. He’s also started communicating with new people, showing interest in other kids — and even made friends. That means so much!

Olena, mother of Zakhar

“Because of chemotherapy, my son’s blood tests often get worse, so we need supportive therapy. **He dreams of getting well and going to a fun park with his friends.**

Maria, mother of Rostyslav

“We are undergoing chemotherapy, and **the medicine provided by the foundation really helps** us manage the side effects: intoxication, liver problems, and digestive issues

Lyudmyla, mother of Serhii

Help to family-type children's homes

We provide assistance in ensuring:

- Decent living conditions
- Access to education
- Emergency and crisis support

2024 Results:

 **63** families received support

 **525** children received support

 **84** aid deliveries completed

- 32** educational devices provided
- 85** pieces of furniture delivered
- 175** household essentials supplied
- 50** household appliances delivered
- 4** power stations installed

1 593 088 UAH
annual program budget

Over 1,300 family-type children's homes operate in Ukraine, caring for **9,000+ children**
**according to Ministry of Social Policy, May 2024)*

The program is implemented in cooperation with the Ministry of Social Policy and local child welfare services

 **Ministry of Social Policy of Ukraine**

Large Families We've Helped

The **Help to family-type children's homes program** has been running for two years. During this time, over **114 families** have received the support they needed. Each family is a unique story of care, strength, and love. We are honored to share with you some of the stories and messages from families we supported in 2024.

Blahoveshchenskyi Family, Dnipropetrovsk Region

This family carefully preserves Ukrainian traditions. Their family-type children's home was founded in 2017. Today, mother Aliona is raising 9 children on her own.

"We are sincerely grateful for the stove and kitchen hood you provided. You didn't just improve our daily routine — you also took into account that a big family like ours bakes a lot. Bread and pastries help us through these difficult times, and your support gives us strength to move forward."

"We truly thank you for the tablets you provided. They are very much needed for our children's education. Your help means a lot, and we are grateful for your care and support. There are so few organizations that help so sincerely. You are truly doing great work!"

Oleksiuk Family, Khmelnytskyi Region

Tetiana Oleksiuk is raising 9 school-aged children. The family faced challenges with access to learning devices — at times, the children had to share one phone for online classes.

"At the hardest moment for our country — during war, bombings, and constant power outages — you helped us with a refrigerator. It allows us to store large amounts of prepared food for the children. We're sincerely grateful for your help and support."

Brahinets Family, Kyiv Region

Oleksii and Yelyzaveta are raising 14 foster children. Due to the war, they evacuated to Poland, but returned home in the summer of 2024 — thanks to a private shelter built by the father.

Emergency Aid For “OKHMATDYT” Children’s Hospital After Missile Strike

On July 8, 2024, **Kyiv’s Okhmatdyt Children’s Hospital** suffered severe destruction due to a russian missile attack.

A total of 24 departments were damaged, including the toxicology and hematology units. Two power substations were destroyed. Nearly **300 people** were injured, including **8 children**. Two adults and one child were killed.

Thanks to our emergency response project and a fundraising campaign via the **Fishka** platform, we were able to purchase and deliver medical equipment worth **5 million UAH** to the **hospital’s departments of ultrasound diagnostics and otolaryngology**, namely:

- ✕ DC-80 Ultrasound Diagnostic System
- ✕ NET-1100 ENT Treatment and Diagnostic Unit

PROJECTS
CENTER
OF FUTURE

“Resilience: Regained Strength 2024” Project

This is one of our key initiatives in 2024. The project focuses on improving the quality and accessibility of medical rehabilitation and reintegration for people who have been injured as a result of shelling or military actions.*

The mission — the mission of the project is to help as many injured Ukrainians as possible return to independent living and to reduce the long-term social impact of war-related injuries.

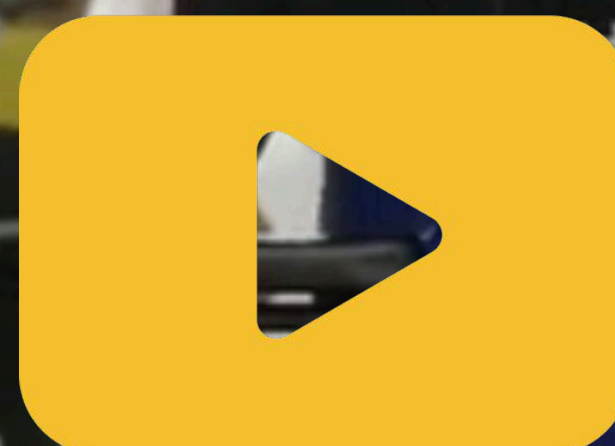

Our strategic goal — is to increase the recovery level of patients by supporting their physical rehabilitation, social adaptation, and reintegration. We aim to help people return to meaningful life roles and regain a sense of dignity and inclusion in society.

**For more detailed information, please see the full project report.*

[REPORT](#)

The project is implemented with the support of GlobalGiving and is dedicated to assisting those who have suffered serious injuries due to the war.

Project Results

7

leading medical institutions in Ukraine received our support

22

units of modern medical and rehabilitation equipment delivered

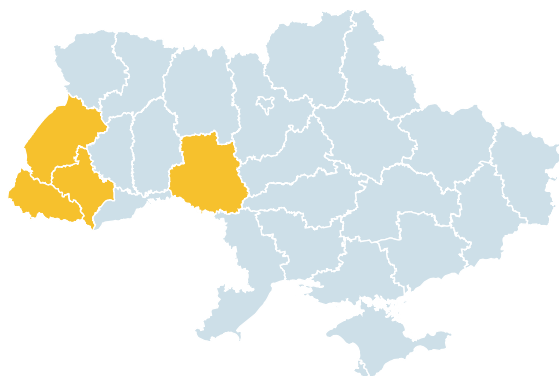

38

doctors successfully completed training in electromyography, ultrasound diagnostics, and other advanced treatment methods

The project is implemented with the support of GlobalGiving and is focused on helping people who suffered serious injuries due to the war.

Project Locations:

Lviv, Zakarpattia, Vinnytsia, and Ivano-Frankivsk regions

Project Budget:

10 MLN UAH

Impact:

Each year, around 15,000 people will receive better medical care thanks to the introduction of modern equipment and improved medical training. Advanced technologies help make faster and more accurate diagnoses, choose the best treatment methods, and speed up recovery. This reduces pressure on the healthcare system and allows more patients to get help — increasing their chances of returning to active life.

Doctor's Feedback On Our Medical Projects

“This has significantly improved the effectiveness of our rehabilitation work.

We received continuous motion devices for the shoulder and knee joints — equipment we urgently needed. This has made treatment of joint contractures and movement limitations much more effective. It also allowed us to reduce the load on our specialists, giving them more time for other important tasks. Now, we can do more in less time

Olena Dolynna,
Yushchenko Hospital, Vinnytsia

The ultrasound training on the musculoskeletal system was extremely useful and informative. We learned about advanced diagnostic methods and received valuable recommendations that we now apply in our daily work with patients.

Solomiya Chycherska,
Neurosurgery Center, Uzhhorod

The suspension system for active patient rehabilitation and the multifunctional hand therapy table are among the most advanced equipment we currently have. This greatly improves the effectiveness of our rehabilitation programs

Yuriy Papirnyk,
“Halychyna” Rehabilitation Center

“Thanks to the training on back pain diagnostics, our patients now receive improved rehabilitation care.

“With the new electroneuromyograph, we now receive detailed data about peripheral nerve function — especially in patients with war-related injuries.

Constant improvement is the foundation of our work. The training provided by the foundation was another important step toward better care. The skills and knowledge we gained help us deliver high-quality medical services to our female patients. Protecting women's health is essential — today and for the future.

Olena Prykopenko,
Lypa Hospital, Lviv

Constant improvement is the foundation of our work. The training provided by the foundation was another important step toward better care. The skills and knowledge we gained help us deliver high-quality medical services to our female patients. Protecting women's health is essential — today and for the future.

Kateryna Zahorodnia,
Ivano-Frankivsk Hospital

Right after the training, all our specialists began using their new skills — and the results with patients have been excellent. The course on back pain diagnostics and treatment has helped us provide better rehabilitation outcomes.

Kateryna Zinovieva,
Uzhhorod Hospital

The Power Of Partnership: Cooperation With city24 And Ukrposhta

city24 and Ukrposhta are among the most active partners of our Ukraine war help center program.

This year, thanks to our joint efforts, we provided essential aid to Ukrainian defenders worth

4 016 790 UAH

- 7 Starlink terminals
- 5 generators
- 19 power stations
- 20 units of computer equipment
- 11 drones of various types
- 2 UAV control systems
- 23 signal amplifiers

“When we see the results of our joint work, we know we’re moving in the right direction. That motivates us to grow and scale up.”

Dmytro Hrysha, city24

“Doing good is cool. This year was especially successful for us in fundraising to support our defenders — and we’re truly happy about that.”

Olena Doroshenko, Ukrposhta

How We Supported Ukraine's Defense Forces in 2024

Mechanized Battalion 12:34 PM

Received the Mavics. Already in use. Thank you for your support.

Reconnaissance Battalion 10:05 AM

EW systems connected. Signals are being jammed.

National Guard 14:05 PM

Generator is up and running. We have power — everything works

Special Operations Unit 11:10 AM

Starlink is working perfectly. We stay connected.

National Police 11:10 PM

The searchlight is already helping us detect and take down drones. Together to victory!

United For Good: Results Of Partnership With dobro.ua And EasyPay

Together, we implemented more than 200 aid projects, and we're not stopping!

- total funds raised on the platform exceeded **25 million UAH**
- over **2,500 donors** supported dozens of our foundation's projects
- delivered **11 hearing aids: 10 for children** with hearing loss, and **1 for a Ukrainian veteran**
- funded **6 treatment and rehabilitation courses** for seriously ill children
- supplied **4 hospitals** with essential medical equipment
- provided **18 children** with individual assistance

Our partnership has lasted for many years, and 2024 was another important step forward

- provided tablets for education to **3 family-type children's homes** caring for **26 children** on Children's Day
- organized a St. Nicholas Day celebration for **70 children** at the Kyiv Children's Home named after Horodetskyi and gifted them warm sportswear
- supplied **equipment to the Defense Forces**, including: 2 laser flashlights, 2 reconnaissance systems, 4 laptops, 14 tablets, car-mounted signal receiver, 2 power stations

Partnership With Vodafone Ukraine

In 2024, we launched a large-scale partnership with Vodafone Ukraine to support people affected by the war. Together, we:

Improved living and learning conditions for children in **6 family-type children's homes**

Organized comprehensive electromyography training for **10 doctors** from leading medical institutions in Kyiv, Vinnytsia, Cherkasy, Dnipro, Lviv, and Rakhiv

Supplied **4 medical facilities** in Kherson, Vinnytsia, Lviv, and Uzhhorod with essential equipment, including: a physiotherapy patient lift, rehabilitation board and stairs, gynecological chair, syringe and infusion pumps, a passive rehabilitation device

2 326 406 UAH

total projects budget

“We are grateful to Vodafone Ukraine for their support and look forward to continuing our joint efforts for a better future in Ukraine.”

Support For Charitable Foundations And Partners Projects

In 2024, as part of the Ukraine war help center program, we provided financial assistance to **8 Ukrainian charitable and civic organizations**.

Our support focused on strengthening key initiatives, including: creation of a bone marrow donor registry, social support for people in difficult life situations, aid for children with cancer, humanitarian demining, development of adaptive sports for veterans and other impactful projects

CHARITABLE FOUNDATION
"DEVELOPMENT OF CHERNIHIV"

“By supporting important initiatives, we are building a better future for Ukraine together.”

Vadym Khadzhiglov,
Head of Office

Our Media Presence in 2024

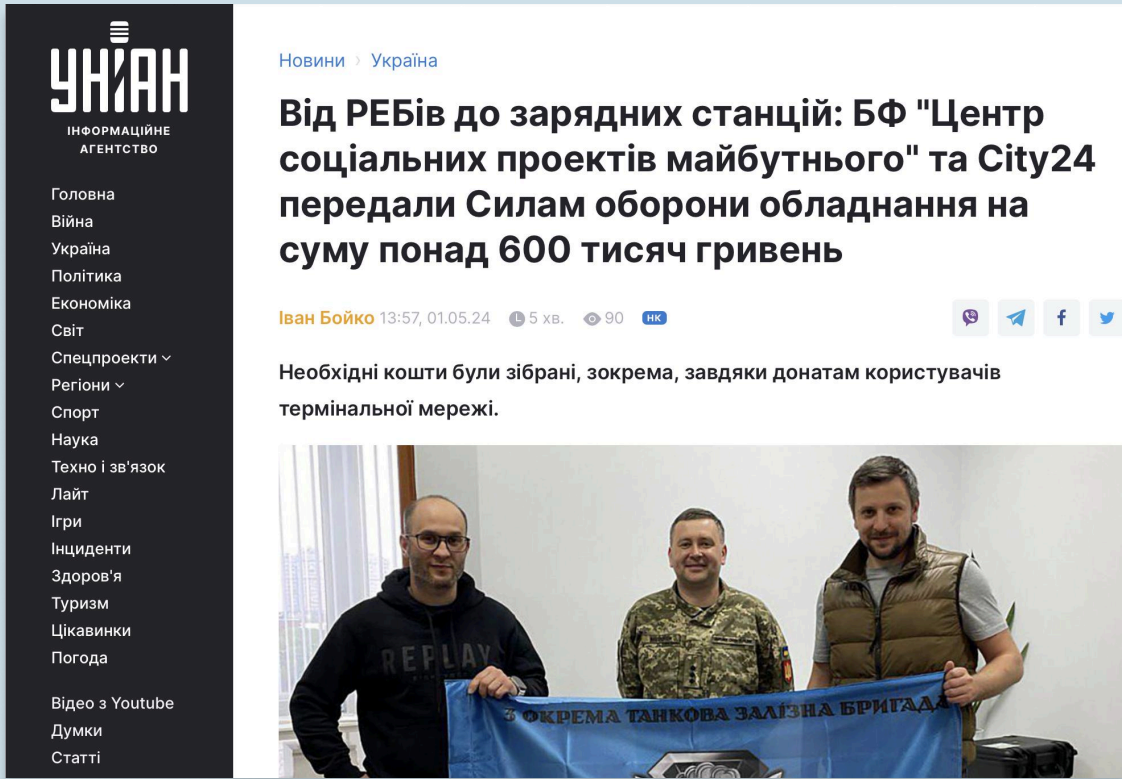

This year, Ukrainian media covered our work — including support for hospitals, rehabilitation of those affected by the war, aid to defenders, and other important initiatives.

Thanks to this media attention, we were able to share vital information with a wide audience and engage more people in our mission.

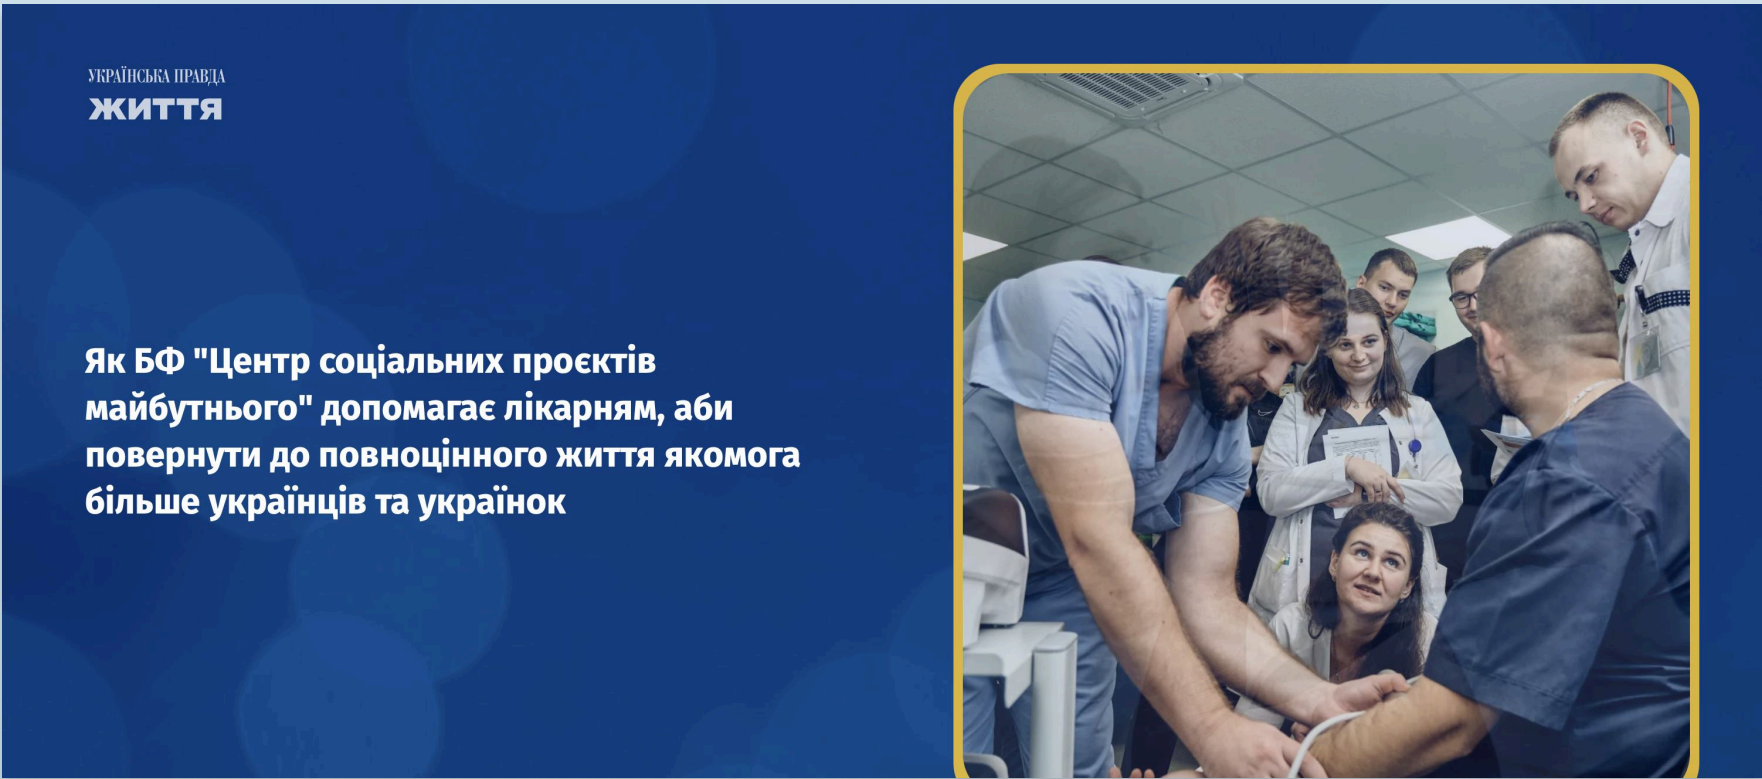

Here are some of the publications
that featured our work:

We In Professional Communities

At the beginning of 2024, we launched the foundation’s official page on LinkedIn. Our goal was to connect more closely with the professional community, share our experience, present our projects, and explore new opportunities for collaboration with both Ukrainian and international partners.

In less than a year, our page brought together over 1,000 followers — people who care about aid, development, and Ukraine’s recovery. This inspires us to keep moving forward and make our work even more visible to the world.

Message From The Head Of Office

The year 2024 was a year of serious challenges for our team. We worked under constant alerts and instability — but we never stopped. On the contrary, we grew stronger, and expanded the reach of our support.

We implemented a number of large-scale projects, with "Resilience: Regained Strength" standing out as a key initiative — a program of recovery and rehabilitation that restores not only health, but also dignity and self-belief. Another important milestone was our contribution to the recovery of the Okhmatdyt National Children's Hospital.

We also carried out targeted medical projects in the Lviv, Kherson, Mykolaiv, and Kharkiv regions — in large part thanks to our productive partnership with Vodafone Ukraine, which began in 2024.

Our family-type children's homes support program has already reached over 100 families. We believe that every child deserves to grow up with care and stability — and we will continue standing by their side.

“We worked under constant alerts and instability — but we never stopped. On the contrary, we grew stronger, and expanded the reach of our support.

“We look to the future with both responsibility and optimism. We believe that a just and lasting peace will return to Ukrainian soil.

Support for the Defense Forces remains another key focus of our work. We are truly grateful to our partners — city24, EasyPay, and Ukrposhta — for their trust and cooperation during these difficult times.

We look to the future with both responsibility and optimism. We believe that a just and lasting peace will return to Ukrainian soil. And we will continue working for those who need us most.

With respect,
Vadym Khadzhioglov
Head of Office

Message From The Charity Leader

The year 2024 marked the third year of the full-scale war in Ukraine — a year of exhaustion, loss, and daily challenges. War leaves a deep impact not only on people's lives, but also on the systems that support them. Our team, along with many partners, worked under constant stress — often at the edge of physical and emotional limits.

Despite this, we were able to implement several important initiatives. Among them — our flagship project Resilience: Regained Strength, aimed at the rehabilitation of people injured as a result of the war. This is a project about recovery — not only physical, but also internal and human.

One of the most painful moments of the year was the large-scale missile attack on Kyiv in the summer of 2024, which caused serious damage to the Okhmatdyt Children's Hospital. We are proud that we were able to respond quickly and contribute to its recovery by providing assistance worth over 5 million UAH.

“The year 2024 marked the third year of the full-scale war in Ukraine — a year of exhaustion, loss, and daily challenges.

“Solidarity, support, and a shared belief in change give us the strength to carry on.

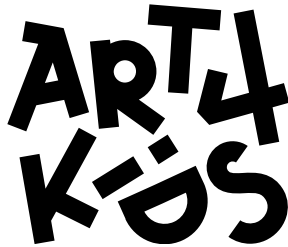

A truly valuable moment for our foundation was the meeting at the GlobalGiving headquarters in Washington D.C. in November 2024. It was an important step in building trust, dialogue, and partnership at the global level.

We recognize that fatigue is one of the greatest risks in the humanitarian sector. But solidarity, support, and a shared belief in change give us the strength to carry on.

With respect,
Ievhen Gluzov
Charity leader

Your Support Creates Change

Thank you to everyone who stood with us in 2024 — to each and every person who joined our projects.

There’s still much important work ahead, and we invite you to be part of the change!

Get involved in our projects, support our efforts, spread the word, and tell your friends, colleagues, and community.

**Every action matters.
Together, we can do more!**
